

Dixie® Sandwich Wraps

Experience better.™

wrap it up.

Serving sandwiches Dixie® style

In today's on-the-go world, sandwiches are a good-to-go part of daily life. People love their sandwiches. And you'll love the way Dixie Sandwich Wraps help you serve them.

Start fresh, stay fresh

When a sandwich starts out hot, both you and your customers want it to stay that way. The same goes for cold, crisp, and fresh sandwiches. There is a unique Dixie Sandwich Wrap to keep any kind of sandwich you create true to its taste.

Strength in innovation

Dixie Sandwich Wraps are designed to resist tearing, not stick to moist ingredients, stop sogginess, and to always look clean and bright. With all the available alternatives, you're sure to find a match for your business. So, keep making the best sandwiches in the world, and we'll take care of wrapping them in style.

Quilt-Rap®

(Insulated Oil and Grease Resistant)

This insulated sandwich wrap features a patented triple-layer construction (a sheet of polyethylene between two layers of paper). The result: heat retention for a longer period of time than other sandwich wraps. Quilt-Rap is also known for its outstanding moisture and grease absorption, controlling moisture to keep foods from becoming soggy, and not sticking to food.

Best Uses

- Excellent barrier for both grease & water
- Sogginess reduction (paper absorbs some of the moisture)
- Excellent opacity
- Heat retention on par with foil wraps
- Good foil replacement

Appropriate Food Types

- Best for hot, high quality foods
- Crispness of food important
- Burritos
- Juicy burgers
- Grilled Reubens
- Toasted sandwiches

Quik-Rap®

(Oil and Grease Resistant)

This economical sheet doubles as a basket liner and sandwich wrap. Its top characteristic is its grease resistance – stopping soak-through of product juices and condiments. Quik-Rap is microwavable, and is a great marketing tool with a white-opaque finish ideal for custom printing. It's also available in unbleached fibers.

Best Uses

- Greasy foods
- Low cost
- Keeps oil & grease inside wrap

Appropriate Food Types

- Hard shell tacos
- Bagels
- Cold sandwiches
- Greasy or oily foods
- Fried fish sandwiches

Food Shop®

(Dry Wax)

This general purpose wrap is a workhorse in the sandwich world. It is dry-waxed. A pro at absorbing excess juices, the Food Shop wrap's wet strength keeps it from falling apart in moist conditions. Yes, it is also microwavable and available in unbleached fibers.

Best Uses

- Wax keeps moisture & heat in with food
- Printed basket liner & sandwich wrap

Appropriate Food Types

- Greasy foods
- Hamburgers
- Burritos
- Hot chicken sandwiches
- Hot/cold sandwiches

Valu-Rap®

(Wet Wax)

This paper wrap is coated on one side with wet/poly wax. What does that mean? Two major benefits. One: food won't stick to the wrap (even tomato sauce). Two, the wax coating holds in moisture and heat – so sandwiches maintain their just-made taste longer. Valu-Rap also doubles as a basket liner and is available in unbleached fibers.

Best Uses

- Wax keeps moisture and heat in with food
- Good for oil & vinegar
- Tomato-based food (very acidic)

Appropriate Food Types

- Meatball sandwiches with tomato sauce
- Cheeseburgers
- Chicken sandwiches
- Hot tortillas
- Burritos

Scan this QR code for more information about Valu-Rap or go to www.GPro.com/Valu-Rap

Sof-Gard®

(Poly-coated)

This wrap is a non-stick pro, thanks to the poly-coating on paper. The thin poly layer keeps melted cheese from sticking and also provides an excellent moisture barrier (repelling grease and water). The bright-white, opaque finish looks crisp and is a great choice for custom printing.

Best Uses

- Excellent barrier (grease & water)
- Excellent opacity, brightness & quality print

Appropriate Food Types

- Melted cheese
- Sticky, sloppy/wet foods
- Premium hot sandwiches
